

ACCES wirelessKey 4.0

Door unlocking/opening with mobile phones, automatic hand-held transmitters & RFID media

ACCES wirelessKey 4.0 is ideal for easy electronic access management to corporate buildings, offices and storage areas and allows time-dependent access for up to 2.500 users. Doors can either be operated via a mobile phone, an automatic hand-held transmitter or RFID media. Access management is conveniently supervised via a network-compatible management software. ACCES wirelessKey 4.0 can be combined with any electronic lock and is surface mounted next to the door, the relay is securely fitted in the interior wall. The built-in LAN ports provide connection to an existing corporate network.

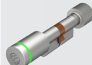

Article No.	Product Name	Short Description
WK401000	ACCES wirelessKey 4.0 including LAN Interface	Electronic access control system; especially for the business sector; allows access via RFID media; network compatible; access administration via management software

Technical Specifications

- **Number of learnable opening media:** Up to 2.500 mobile phones, automatic hand-held transmitter, RFID cards, RFID keyfob
- **Detection range:** Adjustable (short, medium, wide, maximum)
- **Relay switching duration:** Adjustable (3 seconds by default)
- **Interfaces:** LAN and Micro-USB, optional: WLAN
- **Supply voltage:** 9-12 V AC or 9-24 V DC
- **Relay output:** 2A 30V
- **Operating temperature:** -20°C to +60°C
- **Dimensions:** 136 x 70 x 20 mm
- **Colour:** White

Accessories

Short Description	Article No.
 Bluetooth compatible mobile phone or smartphone	-----
 Automatic hand-held transmitter without keys; range: 5 cm to 10 m	WK402030
 Manual hand-held transmitter (Bluetooth Low Energy) with keys; range: up to 10 m	WK402050
 RFID card	ZB204010
RFID keyfob	ZB205010

Short Description	Article No.
 Basic license for management software (various extensions available)	SW201000
 ACCES Digital Cylinder with wireless link, battery operated	DZ201000
 ACCES Electronic Lock with one-way locking system, battery operated	ES101000
 ACCES Electronic Lock with multiple locking system, wired	ES201000

ACCES wirelessKey Management Software

Configuration and management of network-enabled access control systems

The Management Software for ACCES wirelessKey 4.0 and ACCES wirelessKey 2.0 LITE makes it possible for you to easily manage, access and configure your system from the comfort of your computer. The basic license allows you to assign access permissions, the detection and reach of allocated mobile phones/hand-held transmitters and to manage passwords and security codes. As the basic software is composed of multiple modules, the basic package can be customised according to your personal requirements thus enabling a multitude of additional functions and practical applications.

Article No.	Product Name	Short Description
SW201000	ACCES Management Software basic license	Basic license for wirelessKey software; valid for 10 users; per PC; unlimited number of doors; ideal solution for electronic access control and user management via PC

Technical Specifications

- **Operating system:** Windows (Windows XP onwards)

Software Extensions

Artikel Nr.	Bezeichnung	Kurzbeschreibung
SW002010	User expansion package 11-100 (per user)	Package for the expansion of user licenses for 11-100 users.
SW002020	User expansion package 101-2500 (per user)	Package for the expansion of user licenses for 101-2500 users.
SW002030	Function expansion Time & Calendar	Extension package; the per user and time-date-bound access authorizations can be configured. Valid per user, and basic license.
SW002040	Function expansion Monitoring & Surveillance	This upgrade allows the recording and logging of accesses made by individual users. Valid per user, and basic license.
SW002050	Function expansion Central opening	This upgrade enables you to remotely open any door by means of PC software. Can be used with any number of doors. (Porter function). Valid per basic license.
SW002060	Function expansion Import-Export	Allows administrators to import and export data from a CSV file directly into the lock-plan of the software. Valid per basic license.
SW002070	ACCES service contract for 12 months	The ACCES service contract keeps your system up-to-date; contains all software and firmware updates for a period of 12 months. Offer valid for 12 months, extension possible.
